WARRANTY POLICY

Buhler Manufacturing products are warranted for a period of twelve (12) months (90 days for commercial application) from original date of purchase, by original purchaser, to be free from defects in material and workmanship under correct, normal agricultural use and proper applications.

Buhler Manufacturing’s obligations under this warranty shall be limited to the repair or exchange, at Buhler Manufacturing’s option, of any Buhler Manufacturing product or part which proves to be defective as provided. Buhler Manufacturing reserves the right to either inspect the product at the buyer’s location or have it returned to the factory for inspection.

The above warranty does not extend to goods damaged or subject to accident, abuse or misuse after shipment from Buhler Manufacturing’s factory, nor to goods altered or repaired by anyone other than an authorized Buhler Manufacturing representative.

Buhler Manufacturing makes no Express Warranties other than those, which are specifically described. Any description of goods, including any references and specifications in catalogues, circulars and other written material published, is for the sole purpose of identifying goods and shall conform to such descriptions. Any sample or model is for illustrative purposes only and does not create an Express Warranty that the goods conform to sample or model shown.

The purchaser is solely responsible for determining suitability of goods sold. This warranty is expressly in lieu of all other warranties expressed or implied. Buhler Manufacturing will in no event be liable for any incidental or consequential damages whatsoever. Nor for any sum in excess of the price received for the goods for which liability is claimed.

WARRANTY CLAIMS:

Warranty requests must be prepared on Buhler Manufacturing Warranty Claim Forms with all requested information properly completed. Warranty Claims must be submitted within a thirty (30) day period from date of failure repair.

WARRANTY LABOR:

Any labor subject to warranty **must** be authorized by Buhler Manufacturing. The labor rate for replacing defective parts, where applicable, will be credited at 100% of the dealer’s posted shop rate. Defective parts will receive an extra 10% discount to assist with freight or other incidental costs.

GOVERNMENT LEGISLATION:

Warranty terms and conditions are subject to Provincial or State legislation.

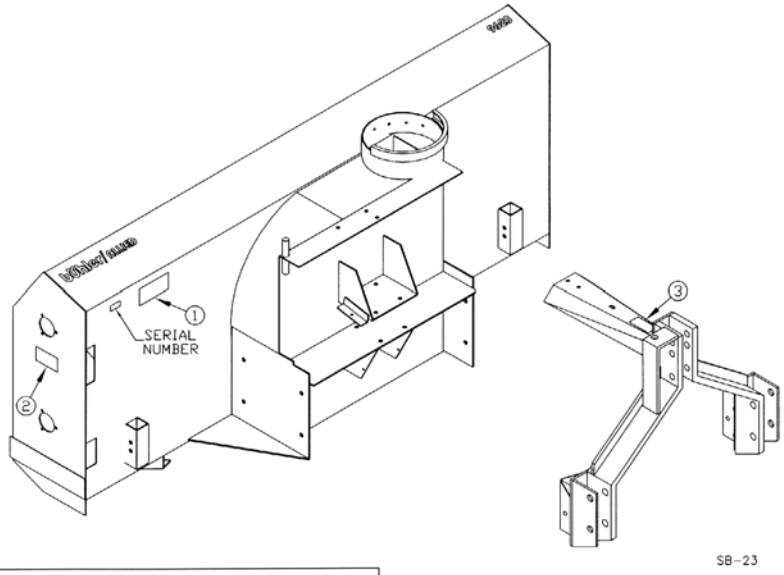
IMPORTANT FACTS:

Buckets and Bucket Tines Carry No Warranty
Bent Spears Carry No Warranty
Snowblower Fan Shafts Carry No Warranty
Mower Blades Carry No Warranty
Portable Auger Parts Have Two (2) Year Warranty
Loader Parts Have Two (2) Year Warranty

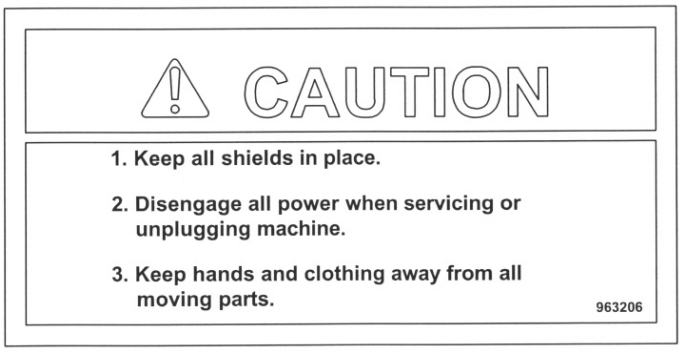
IMPORTANT NOTE: This warranty does not apply to rentals

SNOWBLOWER

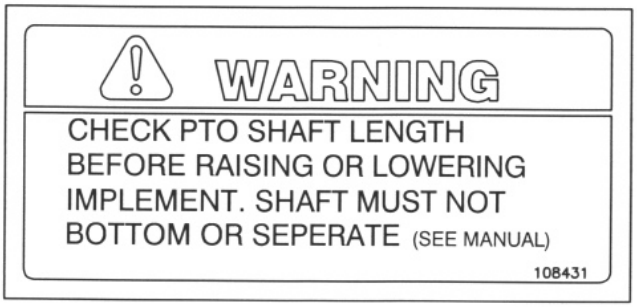
This manual is for 96" Allied Snowblower with a quick coupling hitch. With this hitch, the blower can be mounted on a tractor with either a quick hitch or the standard three-point hitch. All 96" Allied snowblowers have a sealed oil bath gearbox. The snowblower is the push type and will mount to a tractor with 540 rpm PTO. It is supplied with category 2 pins with conversion bushings to category 3 available. This 96" wide snowblower comes with hydraulic chute control as standard equipment. A hand crank chute control is available. There is a shear bolt on the auger and on the PTO shaft to protect the machine from damage if a large object is picked up. Any smaller objects in the snow will be thrown with it and could cause serious injury. Do not let anyone stand behind the tractor in the area of the discharged snow.



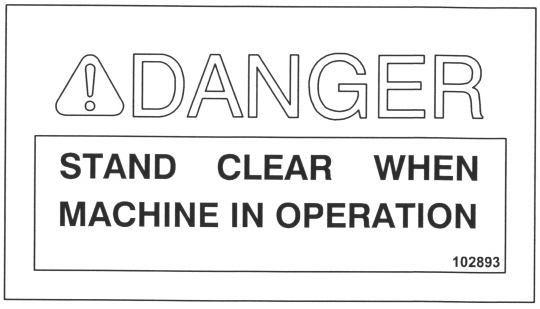
Replace safety signs immediately should they become damaged, torn or illegible. Obtain replacements from your authorized dealer using the part numbers shown.



#1



#3



#2

OPERATING INSTRUCTIONS

1. Do not operate the blower in the fully raised position. The three-point hitch on some tractors rises high enough to cause the PTO shaft to bind. This can cause damage to the PTO shaft and/or to the hitch and pins.

2. Depth of cut can be partially controlled by tilting the blower forward or backward. Adjust the tractor quick hitch so the snowblower is just slightly tilted back when resting on the ground.
   ⚠ **CAUTION:** Excessive backward tilt may cause the "U" joints to flutter resulting in PTO shear bolt failure.

3. Run the blower at low rpm to check operation before blowing snow.

4. The snowblower has two shear bolts to protect the tractor and blower in case a large object enters the blower. PTO shear bolt - two 5/16" x 1" (Grade 8); Auger shear bolt – 5/16” x 1 ¼” (Grade 5). Shear bolts should be fastened with a lock nut or two jam nuts. These bolts must be kept tight to prevent wear of the bolt and bolt holes.

5. Never run PTO shaft at over 600 rpm.

6. Chain Tension: Slack on the lower side of the chain should be 3/8” to ½”.

7. Lubrication:
   a) The spout clamps and rings should be periodically lubricated with gun grease.
   b) PTO shaft universal joints and square shaft slide should be greased daily.
   c) Regularly oiling the chain will significantly increase the life of the chain.
   d) The grease fitting on the hydraulic spout swivel arm should be kept lubricated.
   e) Gearbox - Use any 80-90 gear oil or multigrade with 80 minimum.

8. Periodically check all bolts for tightness. The bolt holding on the fan and the bearing bolts are of particular importance.

9. ⚠ **Danger:** Always stop blowing for servicing or unplugging. The PTO Should be disengaged before dismounting from the tractor.

10. ⚠ **Caution:** Always check to see that both ends of the PTO shaft are securely attached as per instructions every time you are preparing to use the Snowblower.

OPERATING INSTRUCTIONS – cont’d

11. Shear Sprocket: The shear sprocket (#24) should be checked at the beginning of every season to make sure it will spin freely. With time this sprocket could corrode and seize which will not allow the shear bolt to break if something jams in the snowblower auger. Clean to loosen if necessary.

12. When replacing bearings or tightening a loose bearing collar, always tighten collar in the direction of shaft rotation using a center punch or a similar tool.

ASSEMBLY INSTRUCTIONS

1. Fasten the two quick hitch arms (#57) to the main body. Use eight 5/8” x 1 ¼” hex bolts, lock washers and hex nuts. **Note:** Lift arms for quick coupling hitch are 30 ¾” long versus 35” for the standard three point hitch.

2. Bolt the quick hitch (#56) to the snowblower body using two ½” x 1 ¼” hex bolts, lock washers and hex nuts. Fasten to the lift arms using three 5/8" x 1 ½” hex bolts on each lift arm. Insert a 1" top link pin at the top and two 1 1/8" lift pins at the bottom of the hitch.

3. Bolt the hitch cross brace (#2) underneath the two quick hitch arms using two 5/8" x 1 ½” hex bolts, lock washers, flat washers and hex nuts.

4. Mount the discharge spout (#3) using the spout clamp (#51) bolted to the spout ring on the snowblower. Lubricate the spout ring and clamp.

5. <u>Hydraulic Spout Swivel:</u>

   a) Mount the swivel arm (#36) onto the swivel pin welded to the back corner of the fan housing using a 1" ID flat washer (#37) and a 3/16" x 1 ½” cotter pin (#52).
   b) Wrap cable (#35) around spout and clamp to the ends of the swivel using ¼” cable clamps (#16).
   c) With the spout turned forward and the swivel arm centered with the spout, clamp the cable to the spout cable anchor using another cable clamp. Ensure that the spout is not jammed and that there is no slack in the cable.
   d) Use a standard 8" stroke cylinder (20 ¼” min., 28 ¼” max. pin centers).
   e) ⚠ **NOTE:** A hydraulic cylinder and hose kit to control the spout deflector is available as an option.

6. Hand Crank (Option):

   a) Fasten hand crank assembly (#50) using two ½” x 1 ¼” hex bolts, lock washer and hex nuts.
   b) Thread cable (#53) through hole in hand crank to even lengths and wrap around the tube to each side of the hole four turns in opposite directions.
   c) Turn spout to center forward position and clamp cable to cable anchor on far side of spout using clamp (#16).

ASSEMBLY INSTRUCTIONS – cont’d.

7. Mounting blower on tractor:

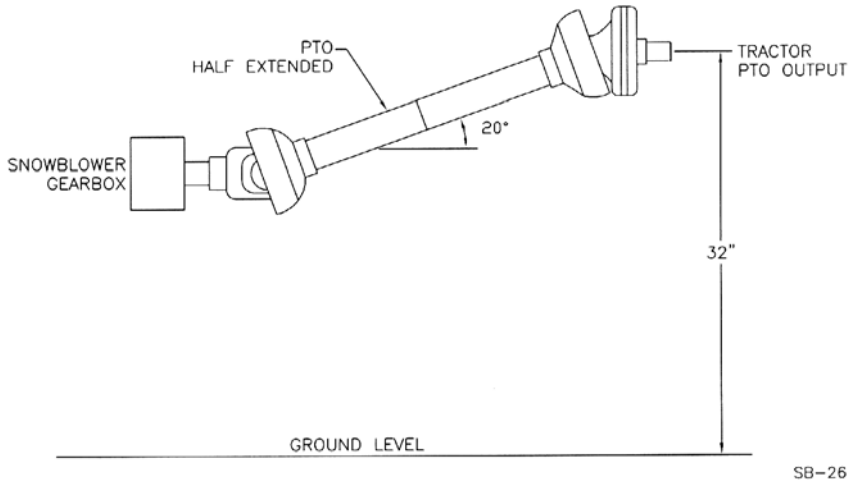
a) The pins supplied with the snowblower are for a category 2 quick hitch. The quick coupling hitch has two holes both at the top of the hitch and at each lift arm. When using a quick coupler, the pins must be in the inside set of holes. Use the outside set of holes with a standard three-point hitch.

b) Using tape or a bright colored marking pen, mark on the outer shields the position where the shaft is completely pushed together and the position where you have a 4"overlap. Watch these marks when moving the blower through all possible operating angles to see that the PTO shaft stays within this range.

c) With the engine on the tractor shut off, attach the PTO shaft. The tractor end has a standard 6-spline end with a spring loaded locking collar. The snowblower end has a clamp-style yoke with a 3/8" key way. Slide the yoke onto the gearbox shaft with the 3/8" key supplied. Lock the yoke in place with the 1/2" x 3" hex bolt and lock nut fitted through the groove in the gearbox shaft. After tightening the bolt, insert and tighten the 3/8" socket set screw supplied.
⚠ **Caution:** Always check to see that both ends of the PTO shaft are securely attached every time the Snowblower is used. This should always be done with the tractor engine off.

d) Check that the PTO shaft does not bottom or separate with the blower in the extreme high and low positions. A longer optional PTO shaft is available if the standard shaft is too short. Check for free movement of all parts in various raised positions; particularly the PTO shaft.

e) **NOTE:** Excessive U-joint wear and shear pin failure may result if the tractor PTO angle exceeds 20 °. The drawing below gives an approximate way to check this angle. With the PTO half extended, the tractor output should not be over 32 inches high. Use 34 inches if the PTO is nearly fully extended and 30 inches if it is nearly compressed.



ASSEMBLY INSTRUCTIONS – cont’d.

8. PTO SHIELD

All snowblowers are supplied with a PTO shield (#61). To install, remove the two rear bolts at the top of the gearbox (#38). Bolt the PTO shield to the gearbox by the hinges using these same bolts. A utility spring (#62) keeps the shield in place. Hook one end of the spring in the hole in the shield and the other end to the hole in the brace under the gearbox.

⚠ **CAUTION:** Do not run the snowblower without this shield in place.

REFILLING GEARBOX WITH OIL:

If the gearbox requires refilling with oil because of repairs to the gearbox, add oil to the level shown in drawing. Check the level regularly using the plug in the lid. The correct level is even with the bottom of the plug.

WHEN ORDERING PARTS

Always give your dealer the Model, Color and Serial Number of your machine to assist him in ordering and obtaining the correct parts. Use the exploded view and tabular listing of the area of interest to exactly identify the required part.

96'' ALLIED SNOWBLOWERS

ITEM	PART #	DESCRIPTION
1	902403A	Main Body
2	965959A	Hitch Cross Brace, 1 1/2'' x 39 1/2''
3	965648	Spout Weldment
4	965904	Auger
5	965905	Fan Assy (Standard 3-Blade)
	965448	Fan Assy (Optional 4-Blade)
6	812362	5/16'' Lock Nut (pl)
7	84072	3/8'' x 3/4'' Hex Bolt (pl)
8	81619	1/2'' x 1'' Hex Bolt (pl)
9	81620	1/2'' x 1 1/4'' Hex Bolt (pl)
10	81637	1/2'' Lock Washer (pl)
11	81636	1/2'' Hex Nut (pl)

SHIPPING KIT AND BUNDLE NUMBERS

The following is a list of kit numbers for this product and the bundle numbers, descriptions, and quantities for each kit.

QUANTITY	BUNDLE NO.	DESCRIPTION
YC9620Q	**96” Allied Snowblower w/Hydraulic Chute Control & 3-Blade Fan**	
1	F0624A	Body Assembly
1	FX9204	Quick Hitch
1	F9211	Spout Assembly
1	F0585	Standard PTO
YC9620Q-4	**96” Allied Snowblower w/Hydraulic Chute Control & 4-Blade Fan**	
1	FX9204	Quick Hitch
1	F0625A	Body Assembly
1	F9211	Spout Assembly
1	F0585	Standard PTO
YC9620QL	**96” Allied Snowblower w/Hydraulic Chute Control, Long PTO & 3-Blade Fan**	
1	F0624A	Body Assembly
1	FX9204	Quick Hitch
1	F9211	Spout Assembly
1	F0586	Long PTO
YC9620QL-4	**96” Allied Snowblower w/Hydraulic Chute Control, Long PTO & 4-Blade Fan**	
1	FX9204	Quick Hitch
1	F0625A	Body Assembly
1	F0586	Long PTO
1	F9211	Spout Assembly

OPTIONAL BUNDLE NUMBERS

The following is a list of options available for the Kits listed above.

F0585 – Standard PTO
F0586 – 36” PTO (optional long)
FX9102 – Hand crank Kit
FX9107 – Hydraulic Chute Control Kit
F9116 – Hydraulic Cylinder & Hose Kit for Spout Swivel
F9117 – Spout Deflector Cylinder & Hose Kit
Y902 – Quick Hitch Kit
